

Boilerplate

Constellix is a subsidiary of Tiggee LLC, the creators of DNS Made Easy, and the world leader in providing IP Anycast enterprise DNS services. Constellix is an Internet Traffic Optimization Services (ITOS) company, and the world leader in next-generation traffic management solutions. Constellix offers a synergistic approach through a unique combination of DNS management with monitoring solutions. The Constellix GeoDNS platform offers the most powerful and precise DNS query management, engineered for the cloud. The platform is fully integrated with Constellix Sonar, which offers a range of advanced monitoring features and intelligent analytics tools.

Services

Geo-Routing, GeoIP Filters, Load balancing, Failover integrated with Sonar Monitoring, DNSSEC compliant, Real-Time Stats, Real-User Monitoring

Who We Are

Headquarters:	Reston, VA
Founded:	2012
President:	Steven Job
Parent Company:	Tiggee

Our Network

Engineered by the same experts who built and maintain the world’s fastest and most reliable network at DNS Made Easy. Our network boasts a 100% uptime history, operating on a fifth generation IP Anycast + backbone.
